# ABOUT US

We are an **electrical construction company** with more than **30 years** of experience, providing **energy solutions**.

Our expertise starts from *design, management, and development* of **medium and high-voltage** electrical projects for *commercial, industrial, and residential*.

Our **qualified professional team** ensures quality, safety and efficiency in each project, from electrical and engineering analysis to electrical substation and transmission lines installation.

We focus on delivering **objective solutions** to add value to our clients' projects.

DESIGN, MANAGEMENT, AND DEVELOPMENT OF  
MEDIUM AND HIGH-VOLTAGE ELECTRICAL PROJECTS

## 01. OUR PHILOSOPHY

At NEZCO, we are dedicated to do things the right way. Encouraging **growth and development of each team member**, fostering an environment where **innovation, efficiency, and teamwork** works along with a **strong sense of responsibility and service**.

## 02. OUR MISSION

**Offer tailored electrical solutions** that achieve every project requirement, positioning ourselves as strategic ally for our clients. We are committed to conduct business with integrity, providing quality and efficiency in every stage, promoting safety and best practices to achieve outstanding results.

## 03. OUR VISIÓN

**Become industry leaders in the electrical sector**, establishing a regional benchmark for energy solutions known for responsiveness and quality. Our goal is to build long-term relationships with our clients, based on integrity and excellence.

## 04. OUR VALUES

- INTEGRITY
- QUALITY
- COMMITMENT
- TEAMWORK
- TRUST
- RESPONSIBILITY

# OUR SERVICES

## LOAD INCREASES

We handle all necessary paperwork, analyzing current and future consumption. Design and develop adjustments to any electrical system to guarantee a reliable and optimized power supply.

## MRO

- **Preventive and corrective maintenance:**

We perform regular inspections and preventive maintenance to avoid failures and extend the life of any electrical equipment.

- **Immediate repairs:**

We can attend rapidly any electrical issues, minimizing downtime and restoring operations safely.

- **Efficient operation:**

We guarantee any electrical systems operate at maximum efficiency, optimizing performance and reducing operational costs.

## CFE AND CENACE PROCEDURES

We manage all legal permits, and its documentation, coordinating with the authorities directly the development of electrical projects to comply with all regulations.

## POWER FACTOR CORRECTION

Guarantee compliance with the new requirement for maintaining a 95% power factor.

## GRID CODE

- Ensuring energy quality
- Capacitor banks
- Grid stability
- Response to disturbances
- Protection equipment
- Network maintenance.

## CIVIL AND COMPLEMENTARY WORKS

We provide general construction services for commercial and industrial projects, including duct banks, vaults, manholes, meter walls, pavement, and more.

## ELECTRICAL STUDIES

We conduct comprehensive electrical studies to evaluate and enhance the performance of any electrical system.

Through detailed analysis, we identify areas for improvement, ensure compliance with regulations, and optimize the efficiency and safety of any facility.

Our comprehensive approach guarantees precise solutions tailored to your specific needs:

- Power factor
- Harmonics
- Thermography
- Short-circuit analysis
- Grounding
- Protection coordination
- Energy efficiency
- Energy loss reduction

## OVERHEAD AND UNDERGROUND TRANSMISSION LINES

We design, construct, and maintain both overhead and underground transmission lines, ensuring a reliable and safe power supply while complying with regulations.

## OVERHEAD AND UNDERGROUND DISTRIBUTION LINES

Installation and maintenance of both overhead and underground electrical distribution lines, providing secure and efficient solutions tailored to each project's needs.

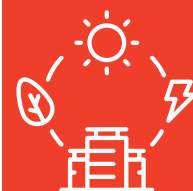

## EPC CONTRACTOR

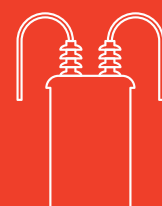

We provide comprehensive "EPC Contractor" services for electrical infrastructure projects, following a "turnkey" approach:

- Engineering: Custom electrical solutions, from conceptual development to required permits.
- Procurement: Material and equipment sourcing through our global network, optimizing cost, quality, and delivery times.
- Construction: Infrastructure development with precision and professionalism, using qualified in-house personnel.

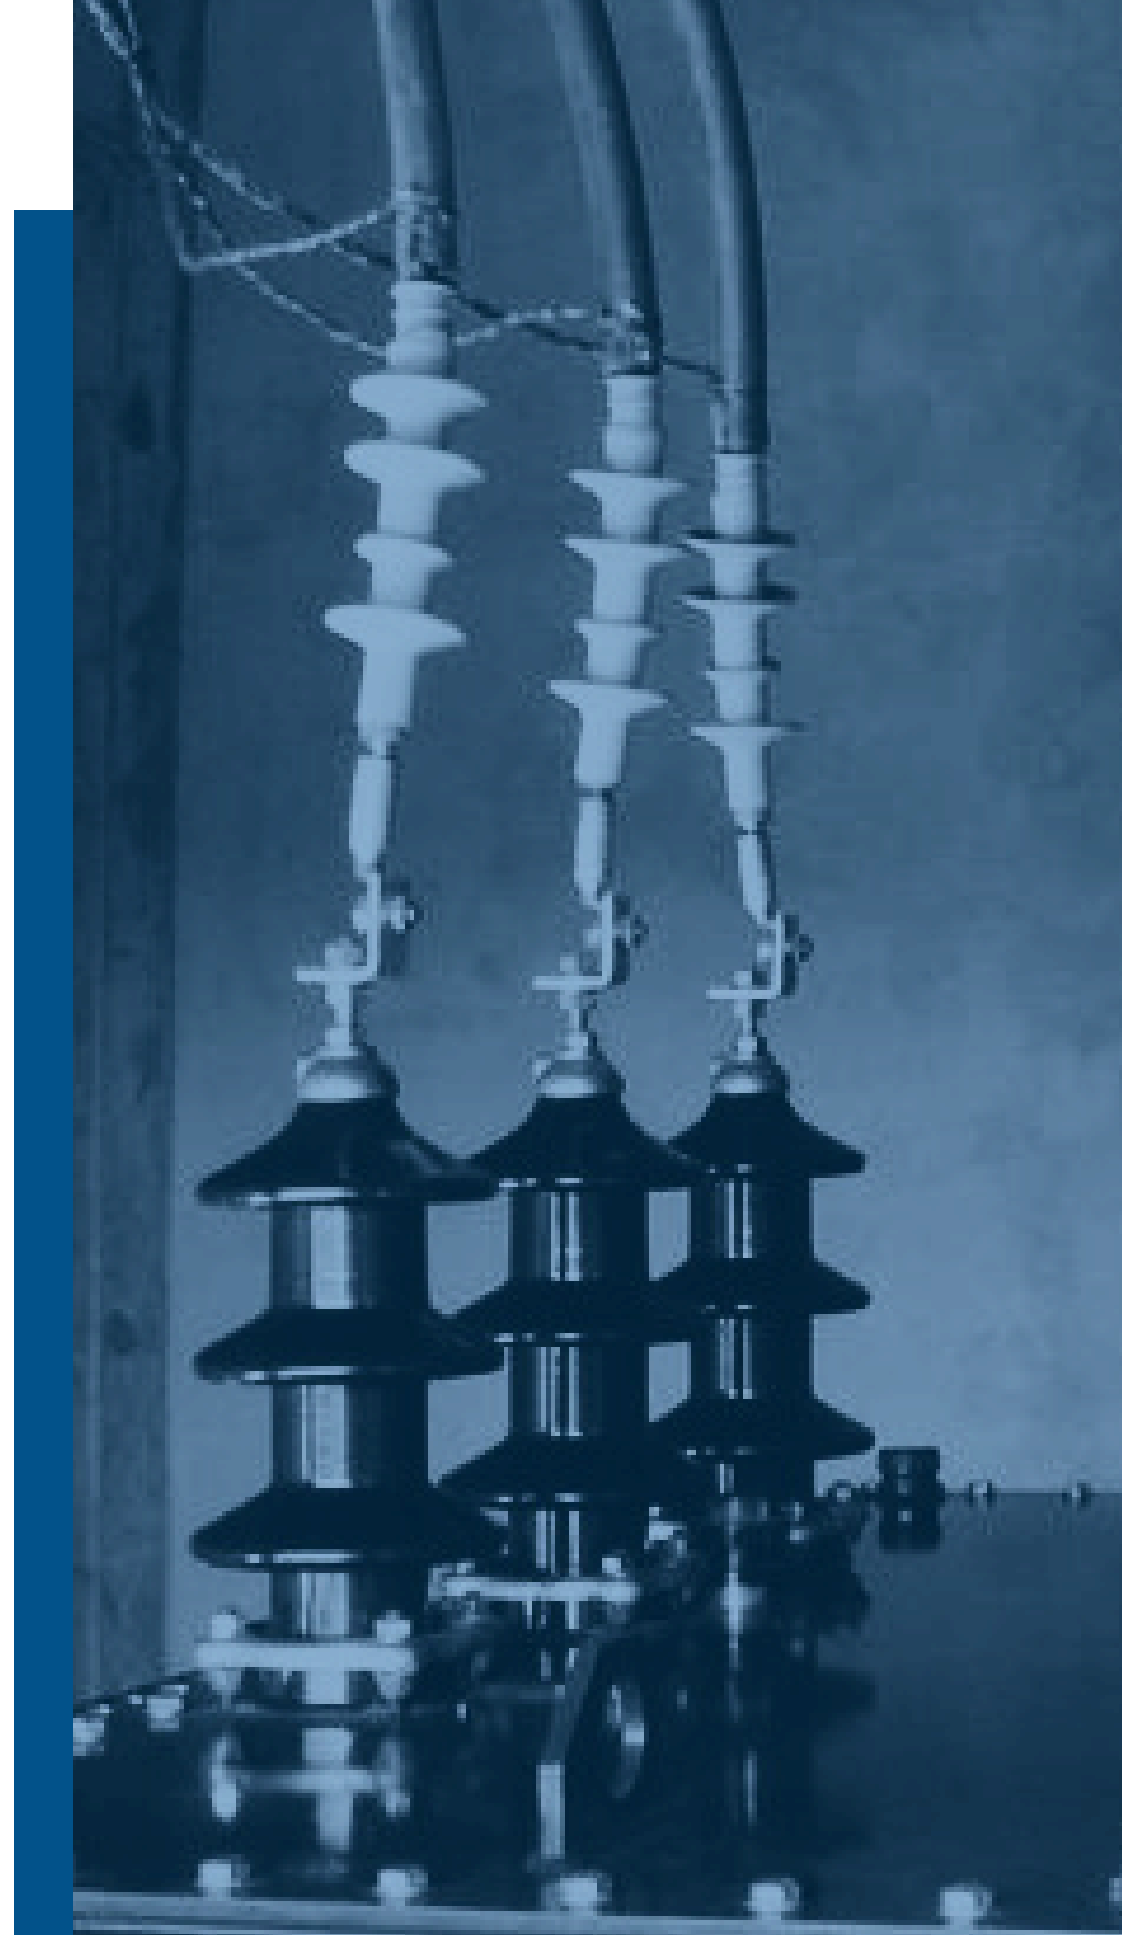

## ENERGY GENERATION AND STORAGE

- Solar energy projects
- Combined cycle power plants
- Gas and/or diesel power generation
- Wind farms
- Battery banks

## SUBSTATIONS

We build substations according to project requirements, offering end-to-end services from design to commissioning and maintenance.

# SPECIALIZED SERVICES FOR INDUSTRY

## WE EVOLVE WITH AND FOR THE INDUSTRY

We take a comprehensive approach to our clients' needs, meeting the highest standards.

Our **multidisciplinary team** is equipped to handle all industry requirements, delivering comprehensive and **customized solutions**.

- INDUSTRIAL BUILDINGS
- METAL STRUCTURES
- VOICE AND DATA SYSTEMS
- GENERAL CONSTRUCTION
- STEEL DECK
- HVAC
- PAVING

WORK

# PNEUMATIC INSTALLATIONS

In addition to our energy-focused services, we provide complete **solutions for pneumatic projects and installations**, specializing in **compressed air systems**.

As **authorized distributors of Parker®**, a leader in tubing and pneumatic components, we guarantee the highest quality in each installation, ensuring efficiency and safety.

# NEZCO AS YOUR ALLY

## EXPERIENCE & QUALITY

Our years of experience in the electrical field allow us to perform our work with complete professionalism and guaranteed quality.

## INTEGRATED SERVICE

Service all-in-one:

- CONSTRUCTION
- ARCHITECTURE
- CIVIL AND ELECTRICAL WORK

## TRAINED PERSONNEL

We have a team of highly trained and certified engineers ready to advise and propose efficient solutions for your projects.

## WRITTEN GUARANTEE

Our experience and professionalism allow us to provide a written guarantee for each project completed for our clients.

## CURRENT CERTIFICATIONS

- REPSE
- International Certification in Thermography Cat.1
- Registered with the Tijuana's fire department
- 10 Plus Company

## EXECUTION CAPACITY

We have our own team to execute any class of medium to large scale projects, both regionally and nationally.

## OUR CERTIFICATIONS

## NATIONWIDE COVERAGE

# AFFILIATIONS

Actively participating with nationwide organizations that drive industrial and electrical sector development, Nezcó is part of strategic projects and working groups.

Our partnerships strengthens our commitment to excellence, continuous improvement and adherence to industry standards.

## OUR CLIENTS

**MEDIA TENSIÓN
